MSI recommends Microsoft® Windows® XP Professional

17-inch 16:10 widescreen display

The impressive 17-inch widescreen offers exceptional clarity and outstanding durability. The large display provides eye-soothing performance and renders extremely clear picture quality to enhance your viewing pleasure. You can enjoy your favorite DVD movies like you never did before!

The AMD® Mobility 64-bit CPU: Turion64

The MEGA BOOK L710 supports AMD®'s latest Turion64 CPU and 64-bit technology. Turion64 is the latest mobile processor from AMD®, built on AMD®'s 64-bit industry-leading, high-volume 90 nm manufacturing process. The 90 nm process produces smaller and faster transistors and uses AMD's cool and quiet technology to give the transistors a speed boost, resulting in higher performance headroom.

Ergonomically Designed Keyboard

The L710 keyboard has a good layout which is perfect for those long typing sessions. The key placement is easily within reach without any need to lift the wrist, making it easy to type at full speed without making mistakes.

Stay cool with MSI ACS (Advanced Cooling System)

The ACS (Advanced Cooling System) is a unique technology provided only by MSI. Computers are heat-sensitive; therefore MSI has come out with its own heat dissipation technology - the Advanced Cooling System (ACS). You don't have to worry about excessively high temperature while using your notebook. Enjoy working in a cool environment anytime!

802.11b/g Wireless Function

The Intel® PRO/Wireless network connection has both 802.11b and rapid 802.11g wireless networking capabilities. It is designed to maintain high throughput at longer ranges in office or home environments, along with efficient use of power to enable longer system battery life. Enjoy the freedom and flexibility to work and play without hunting for a phone jack, network cable, or plugging in a special card. With speeds up to 54Mbps at 2.4 GHz, the Intel PRO/Wireless Network connection enables fast, blazing network connections.

Bluetooth Supported

MSI MEGA BOOK Bluetooth module is designed to provide a solution for Bluetooth connectivity. It extends your notebook up to 7 Bluetooth device notes. It also fully supports Wide Range Self Power Mode for USB 2.0/1.1/1.0 Devices.

A wide range of compatible profiles enable Bluetooth Star Hub to communicate with Bluetooth mouse/ keyboard/ game pad, and exchange your favorite photo/music files with Bluetooth embedded cellular phone and handheld device.

4-in-1 Card Reader

Link your digital equipment, like digital camera,

with the 4-in-1 card reader. Transfer photos with ease from your digital camera to your L710. The 4-in-1 card reader accepts various popular types of memory cards such as MS, MS Pro, MMC, and SD, thus there is no need to buy an additional card reader.

 **Live-update technology from MSI**

MSI Live Update can automatically detect and flash the firmware under the Windows environment. You can set the schedule of the firmware and update the driver with the on-schedule connection to MSI's dedicated server, thereby helping you keep your system in its most optimum status.
